Welcome to **"LEAN DELIVERS"** ...building a model of increasing value

A hosted, collaborative thinking event with Alden B. Davis 08 November 2001

Workshop Objectives

 Participants will be able to describe how a lean philosophy manifests itself in various organizational processes (captured in "standards of excellence").

2. Participants will be able to describe how the pursuit of these standards directly impacts the value of a business.

Introductions

Name Company • Where from Role Years in Industry Favorite food

Opening Questionaire

F

F

T

- Most of our workforce can personally connect their daily work and associated T F expenses to an Income Sheet and Balance Statement.
- Our financial people understand the impact of "lean" so well that they are tough negotiators when setting budget expectations for our lean projects.
- 3. Our organization shares a common understanding of the word "value."
- 4. Lean leaders have personal vision/understanding of value creation.
- 5. "Value" is realized when a lean project has been completed. T F
- 6. Pursuing lean projects make business sense because they are the right thing **T F** to do.

Workshop Purpose

To demystify the financial world of CFOs and expose the mental model of CEOs

In a way that improves the effectiveness of our leadership

So that we increase the purposefulness of all improvement activity.

Our Choice

- Poor standards deliver <u>Ugly</u> results/rewards
- Good standards deliver <u>Poor</u> results/rewards
- Excellent standards deliver <u>Good</u> results/rewards
- Outstanding standards <u>Take</u> all the rewards

Success Looks Like...

Given The ValueTree, Lean concepts and our Lean Philosophy audit wheel

Stand in front of the group and deliver a leadership statement

In a way that puts lean concepts within the context of a lean philosophy & directly links them to ROIC through The ValueTree.

Workshop Outline

Meet the Greats

- Walter Shewhart (1891-1967): Use information (SPC) to control processes and create profitable situations for both businesses and consumers.
 - Shigeo Shingo (1909-1990): Transcend SPC and stop the process when defects occur; good engineering can design out defects. Credited with Poka-Yoke, SMED, Zero Quality Control.
- Kaoru Ishikawa: Created fishbone charts to allow bottomsup approach to root-cause analysis. Believed in companywide quality control throughout a products total life cycle.
- Ed Deming: 14 Points, a management guideline. Believes that management controls 85% of what makes a worker successful. Expounded Shewhart's PDS(study)A cycle.

More Greats

- Genichi Taguchi: Equated quality with cost (and lost revenue). Devised set of tools to identify and prioritize "noise" in the work process.
- Joe Juran: Believed that people were key to quality; shaped Total Quality Management philosophy. Key tenets included management involvement, Pareto, training, project approach. Defined quality as "fitness for use".
- Philip Crosby: Simplified the language and concepts for a broader audience. "Quality if Free", Zero defects, conformance to requirements and prevention are the mantras.

Philosophy

Principles (guidelines for decisions) Principles Principles Principles Standards of Excellence (manifestations) Standards of Excellence Principles Standards of Excellence Standards of Excellence

Principles

Standards of Excellence

Group Work: How would I recognize Lean if I bumped into it?

Task: Create an "audit list" for assigned topic

With the people around your table...

- Introduce yourself
- Open the envelope and read your work assignment
- Create the list and print nicely on your sheet
- Post on our Wall of Fame
- Be prepared to present

Lean Audit Wheel

What is the Value Tree?

- Financial model of the business on one page
 - Visually oriented
 - Interactive
 - Easily understood by people
- Financial tool for developing business context
 - Interrelationships of various dollar flows
 - Drivers of business decisions
- Financial "range-finder"
 - Target identification
 - Target selection
- Financial-world de-mystifier
- Financial guidepost helping answer the essence question..." Is the institution increasing its value (how much its worth) or destroying its value?"

Context within which the Value Tree Fits

The Value Tree Exercise

Guiding Beliefs of the Value Tree

- Long-run institutional health = long-term value creation.
- The majority of the value of most institutions, at any time, is the cash flow derived from existing assets.
- The most significant value creator is superior performance in existing operations
- Value creation is not exclusive to manufacturing organizations.
- Discounted cash flow (NOPLAT-Invested Capital) not EPS is the most comprehensive valuation tool consistent with long-term value creation.
- Value is created by investing capital at returns > the cost of capital.
- Equity holders require all information of all revenues and all claimants to make good decisions.

Key Premise

A direct correlation exists between ROIC and the value (worth) of a company

TNB	Thomas & Betts Corp		
ASD	American Standard Company Inc		
YRK	York International Corp		
CBE	Cooper Industries Inc		
TXT	Textron Inc		
HON	Honeywell Inc		
GWW	Grainger WW Inc		
ALD	AlliedSignal Inc		
HUBb	Hubbell Inc		
TYC	Tyco International Ltd		
GE	General Electric Co		
UTX	United Technologies Corp		

What determines a firm's worth?

For G.E., EPS does not appear to be the driver for the priceearnings multiple.

What determines a firm's worth?

General Electric's P/E seems to be better characterized by a strong return-on-invested-capital number.

What determines a firm's worth?

The same relationship seems to exist at Dell and Gateway; strong ROIC, strong stock price.

Improvements Possible

Key results to be expected with a soundly implemented and well maintained "kaizen."

Immediately:

- 20% 30%
- 30% 40%
- 30% 50%
- 10% 20%
- 50% 60%
- 10% 20%
- 70% 90% a

Productivity improvement Increased equipment uptime Reduction in space runts Reduction in purchased costs Improvement in product quality Reduction in WrkComp Accrual Reduction in WIP inventory

Working "the Tree"

- This is a Small group exercise. The objective is to identify "how" and "where" a serious pursuit of lean concepts will deliver value.
- 2. Review the lean concepts for shared understanding.
- 3. Pick a concept, discuss what gets saved when the concept is implemented.
- 4. Find each "budget line" which would be impacted and list it on the "Finding Value" sheet.
- 5. Red boxes = 10White boxes = 5Blue boxes = 1

Exercise

 Pick a concept from the "Finding Value" sheet which is linked to the ValueTree.

• Prepare to complete the following statement:

 "We are pursuing (tool) because it addresses our Lean Philosophy of (ref. the Lean Wheel) and it contributes to improvements in our ROIC by_____."
